do|se| the right thing!

Up until now, pre-soaking was one of the outdated solutions implemented to prevent cross contamination in healthcare.

Management of pre-soaked mops:

- Time consuming
- Preparation of additional mops for additional areas
- Unused mops must be washed and pre-soaked repeatedly
- Mops pre-soaked with the same quantity of cleaning solution may not be suitable for larger or smaller areas.

controlling cross-contamination for homes, hospitals, and commercial floors.

Management of fully automated mop system:

- Modular and so versatile
- Safe and to keep clean
- Dosage controlled by precise mechanism
- Flexibility to alter mop moistness to suit floor porosity or room size
- User friendly with colour coding and safety key
- Enables the soaking of mops directly on the trolley
- Cost effective by reducing the use of chemicals and water

BREVETTATO - PATENTED SYSTEM

All the advantages of soaking without any complications

FLEXIBLE: the moistness of the mop can be changed quickly during the cleaning procedure.

EFFICIENT: Densely soaks only the cleaning side of the mop: saving 1/3 of cleaning solution for each mop in use. The result can vary depending on the kind of microfibre and support tool that are used to clean.

EFFECTIVE: Dosage system is precise and safe against external alteration. The tank for cleaning solution is hermetic and can be locked in the trolley thanks to a key.
